EXAMINER'S AMENDMENT***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 4/22/05 has been entered.

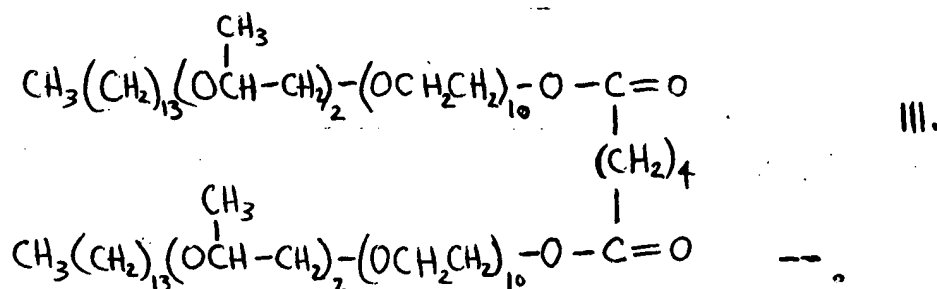

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brett Freeman on August 29, 2005.

The application has been amended as follows:

The Specification:

On page 4, lines 24-31, delete the structural compound of Formula III and insert

Cancel claims 26 and 34.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance.

Of the references of record, the most pertinent are Steer (US 6,627,585) or Evans et al (US 5,837,661). Steer teaches a mousse-forming cleansing shampoo composition having improved conditioning performance comprising a foamable concentrate comprising one surfactant, dispersed particles of a water-insoluble conditioning agent having a particle size of 1 micron or greater, an aqueous carrier, and an aerosol propellant. See Abstract.

Evans et al teach hair conditioning shampoo compositions comprising from about 5% to about 50% by weight of a deterative surfactant, from about 0.05% to about 10% by weight of a silicone hair conditioning agent, from about 0.1% to about 10% of a suspending agent, from about 0.025% to about 1.5% by weight of selected polyalkylene glycols, and water, and optionally one or more additional materials known for use in shampoo or conditioning compositions. See Abstract.

However, Steer or Evans et al do not teach the use of di-PPG-2-myreth-10 adipate in addition to the other requisite components of the composition as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a moisturizing detergent composition containing a cationic polymer, a di-PPG-2 myreth-10

adipate, a monoester emollient, a cleansing surfactant, and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory R. Del Cotto whose telephone number is (571) 272-1312. The examiner can normally be reached on Mon. thru Fri. from 8:30 AM to 6:00 PM.
